Professional summary:

Results-driven Data Science Manager with 7+ years of experience delivering AI, Machine Learning, Generative AI, and advanced analytics solutions across Healthcare, Pharmaceuticals, Bioinformatics, and Retail domains. Proven expertise in building cloud-native data platforms, fraud detection systems, Retrieval-Augmented Generation (RAG) applications, predictive modeling, and supply chain optimization solutions. Experienced in leading cross-functional teams, architecting scalable ML pipelines, and deploying enterprise AI applications using AWS cloud services including SageMaker, Bedrock, S3, Glue, Athena, Lambda, and RDS. Strong background in MLOps, Data Engineering, Risk Analytics, and transforming complex datasets into strategic business intelligence that drives measurable business outcomes.

EDUCATIONAL QUALIFICATIONS

Master of data science certification

Great Lakes Institute of Management and University of Texas at Austin.

Master of science |organic chemistry specialization

Christ University, Bangalore.

TECHNICAL SKILLS:

- **Programming & Databases:** Python, SAS, PostgreSQL, MySQL, Data Warehousing,

Subramani G

SUMMARY OF PROFESSIONAL EXPERIENCE

Manager – Data Science & Risk Analytics

Medybiz pharma pvt ltd|June 2025-present.

- **Strategic Leadership:** Leading a high-performing data analyst team to architect and deploy end-to-end predictive models for early risk identification and compliance.
 - **Fraud & Anomaly Detection:** Engineered sophisticated Machine Learning and Unsupervised Learning models, including Isolation Forest, Graph Networks, and XG boost, to detect financial irregularities and enhance the company's governance framework.
 - **AI-Powered Risk Intelligence (RAG):** Developed a Retrieval-Augmented Generation (RAG) solution leveraging LangChain and LLM-based document retrieval pipelines to enable intelligent document search, automated fraud explanation generation, and contextual investigation support for compliance and audit teams.
 - **Data Orchestration:** Integrated disparate data streams from healthcare and business systems into a unified, scalable analytics warehouse, improving data reliability by 40%.
 - **Executive Insights:** Designed real-time Power BI command centers for C-suite leadership, providing clear visibility into key risk metrics and mitigation strategies.
- Tech Stack:** Python, LangChain, RAG, LLMs, AWS Bedrock, Amazon SageMaker, Amazon S3, AWS Lambda, AWS Glue, Amazon Athena, Amazon RDS, CloudWatch, Power BI, Isolation Forest, XGBoost, Graph Analytics, MLOps.

Senior Data Scientist

Inati Lifestyle -Outzider | January 2025 – May 2025

- **Supply Chain Optimization:** Spearheaded inventory forecasting, customer segmentation, and recommendation system optimization initiatives that reduced overstocking by 15% while maintaining 98% stock availability and improving customer targeting efficiency.
 - **Customer Intelligence:** Developed customer segmentation, churn prediction, and recommendation system models that drove measurable improvements in marketing ROI, customer retention, and engagement.
 - **Cloud Architecture:** Implemented automated data pipelines on AWS Platform to streamline time-series analysis and large-scale classification tasks.
- Tech Stack :** Python, AWS S3, AWS Glue, Amazon Athena, Amazon EC2, Amazon RDS, Forecasting Models, Customer Segmentation, Recommendation Systems, Data Engineering, Power BI.

Computational Biologist (Gen AI)

Katamaran Industries Pvt. Ltd. | July 2024 – December 2024

Data Modeling, Database Design, Query Optimization, Stored Procedures, ETL Development, Data Integration, Data Migration, Data Validation, REST APIs, API Integration,

- **AI&MachineLearning:** Supervised & Unsupervised Learning, Deep Learning, Generative AI, Large Language Models (LLMs), Transformer Models, Hugging Face, Retrieval-Augmented Generation (RAG), LangChain, Prompt Engineering, Agentic AI Systems, Time Series Forecasting, XGboost, Random Forest, Isolation Forest, Graph Neural Networks, Fraud Detection, Predictive Analysis, Customer Segmentation, Churn Prediction.
- **MLOps & LLMOps:** Model Deployment, MLOps, LLMOps, CI/CD Pipelines, Model Monitoring, Experiment Tracking, Workflow Automation, Git Version Control, ML Pipeline Development, Automated Model Retraining, Model Versioning, Containerization, Docker.
- **AWS Cloud Services:** Amazon S3, Amazon EC2, AWS Lambda, AWS Glue, AWS Athena, Amazon RDS, Amazon SageMaker, Amazon Bedrock, AWS IAM, AWS CloudWatch, AWS API Gateway, Amazon Event Bridge, AWS Step Functions.
- **Data Engineering:** ETL/ELT Pipelines, Data Lake Architecture, Data Integration, Feature Engineering, Data Pipeline Automation, Data Quality Monitoring, Data Warehousing, Data Modeling, Workflow Automation
- **Visualization & Business Intelligence:** Power BI, Tableau, Dash (Plotly), Microsoft Excel, Interactive Dashboards, KPI Reporting, Executive Reporting
- **Statistics & Analytics:** Hypothesis Testing, Regression Analysis, Clustering, Time Series Forecasting (SARIMA), Anomaly Detection, Statistical Modeling, Risk Analytics, Experimental Design, Predictive Analytics, Customer Segmentation, Churn Analysis

- **Generative AI Innovation:** Architected AI-driven workflows leveraging Transformer-based models and domain-specific embeddings to accelerate biological data analysis
- **Research Acceleration:** Integrated Large Language Models (LLMs) to automate high-throughput screening, reducing research decision-making time.
Tech Stack : Python, Generative AI, Hugging Face, LangChain, AWS Bedrock, SageMaker, FAISS/Pinecone, Transformers, Bioinformatics,

Research Scientist (Data Science Focus)

K-cat Enzymatic Pvt. Ltd. | June 2023 – July 2024

- **Predictive Modeling:** Developed and tuned XGBoost and Random Forest models to predict enzyme activity, achieving high accuracy in experimental simulations.
- **Data Analysis & Insights:** Processed and analyzed large experimental datasets to identify key factors influencing enzyme behavior, enabling researchers to prioritize experiments and reduce development cycles.
- **Automation:** Built interactive performance dashboards using Dash (Plotly) and Power BI for realtime monitoring of experimental outputs.
Tech Stack : Machine Learning, XGBoost, Random Forest, Python, Power BI, Dash (Plotly).

Executive (Data Analytics)

Biocon Biologics Limited | May 2020 – May 2023

- **Quality & Compliance:** Analyzed insulin batch data to ensure strict adherence to regulatory standards and cGMP compliance.
- **Statistical Analysis:** Conducted variance and stability studies using SAS and SQL, identifying critical process parameters to maintain product consistency.
- Supported cGMP compliance through data-driven insights in collaboration with QA and manufacturing teams.
Tech Stack : SQL, SAS, Power BI, QC Analytics, Statistical Quality Control, cGMP, ETL

Scientist (Data & Research Support)

Anthem Biosciences | September 2017 – May 2020

- **Experimental Design:** Applied regression analysis and hypothesis testing to validate early-stage experimental data and research hypotheses and documenting analytical activities.
- Created visual reports and conducted data validation in early-stage experiments.
Tech Stack : Excel, Regression Analysis, Data Visualization, Statistical Testing, Experimental Design
